Speech-Language Therapy Services

Common Treatment Approaches

Following a thorough assessment and interview with their parent/guardian, your child's Speech-Language Pathologist will determine what the best treatment approach will be. Some approaches your child's provider may suggest include:

- Play Therapy
- Parent Training
- Prompt (Visual Cues)
- It Takes Two to Talk – Hanen Program
- Social Thinking – Michelle Garcia Winner Approach
- Picture Exchange Communication System (PECS)
- Teletherapy

Bilingual Services

At Children's Therapy Place, we have certified Speech-Language Pathologists who can administer assessments and complete treatment in Spanish.

The First Visit

During the first visit, your child's Speech-Language Pathologist will meet with you and your child to discuss current concerns. Following the interview, the provider will then conduct a thorough assessment where it will be determined which services and therapeutic treatment approaches will benefit your child best.

The interview and assessment typically are completed in one hour. If more time is needed for the assessment, the Speech-Language Pathologist will discuss scheduling.

Speech-Language Therapy Benefits

Our Speech-Language Pathologists provide evidenced-based pediatric Speech-Language Therapy services to children, promoting communication and independence.

Through treatment provided by their Speech-Language Pathologist, your child can develop and hone skills needed to confidently and effectively communicate with family, friends, teachers, and peers.
